🐙 GitHub 🏆 LeetCode

PROFILE

- AI practitioner focused on building **agent-based systems** and autonomous workflows using **LangChain** and multi-agent frameworks.
- Hands-on experience with **Generative AI and Transformer models**, including **RAG pipelines** and fine-tuning LLMs for reliable, domain-specific results.
- Strong foundation in **Deep Learning and Data Science**, working with **TensorFlow** and **Scikit-learn** to build predictive models.
- Consistently improved baseline metrics such as **accuracy and F1-score by 15%+** across projects.
- Passionate about writing **production-ready code** and turning research ideas into scalable, real-world AI solutions.

EDUCATION

Bachelor of Engineering in Computer Science and Artificial Intelligence <i>Parul University</i> Pursing Graduation with CGPA : 8.54	Present Vadodra, India
Higher Secondary Certificate (HSC) <i>M.G.M College</i> Completed HSC with 75.50%	06/2023 Virar, India
Secondary School Certificate (SSC) <i>National English High School</i> Completed SSC with 75.40%	06/2021 Virar, India

SKILLS

Machine Learning & Deep Learning:

- Transformers (Attention mechanisms)**, CNNs, RNNs, Supervised/Unsupervised Learning, and Model Optimization using **TensorFlow** and **Scikit-learn**.

Generative & Agentic AI:

- Multi-Agent Systems (**LangGraph**), **AI Orchestration**, RAG Pipelines, Prompt Engineering, and LLM Integration

Databases & Vector Search:

- Relational Database Management (**MySQL**), NoSQL (**MongoDB**), and High-Dimensional Vector Stores (**Pinecone**, **Chroma DB**, **Astra DB**) for semantic search.

Software Engineering & Backend:

- Object-Oriented Programming (OOPS)**, Backend Development (**Django**, **Flask**), and RESTful API design.

CS Fundamentals:

- Database Management Systems (DBMS)**, **Computer Networks (CN)**, Data Structures.

Core Tools:

- Python (Expert), SQL, Git, Docker, Pandas, NumPy, and Matplotlib, DagsHub and MLFlow

LANGUAGES

English	Hindi
Gujarati	Marathi

PROFESSIONAL EXPERIENCE

BCG GenAI Job Simulation on Forage - December 2025 🔗

- Completed a job simulation involving AI-powered financial chatbot development for BCG's GenAI Consulting team.
- Gained experience in Python programming, including the use of libraries such as pandas for data manipulation.
- Integrated and interpreted complex financial data from 10-K and 10-Q reports, employing rule-based logic to create a chatbot that provides user-friendly financial insights and analysis.

Deloitte Australia Data Analytics Job Simulation on Forage - October 2025 [🔗](#)

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

PROJECTS

SafeSpace - AI Mental Health Chatbot [🔗](#)

- Built **SafeSpace**, an empathetic AI chatbot that offers **24/7 mental wellness support** and responds to users in crisis using NLP.
- Designed a **real-time sentiment and risk detection system** to identify signs of suicidal thoughts or self-harm in user conversations.
- Integrated the **Twilio API** to automatically place emergency calls to crisis helplines or trusted contacts when high-risk situations are detected.

Face Emotion Detection [🔗](#)

- Developed a **CNN-based facial emotion recognition system** that classifies expressions into seven emotion categories.
- Implemented **real-time face detection** using OpenCV and Haar Cascades to extract facial regions from live webcam feeds.
- Trained the model on the **FER-2013 dataset**, using data augmentation and dropout to reduce overfitting and improve accuracy.
- Optimized the model for **low-latency, real-time performance** on local hardware.

Movie Recommender System [🔗](#)

- Built an **end-to-end movie recommendation system** that suggests similar movies using content-based features like genres, keywords, cast, and crew.
- Used **NLP techniques** (text preprocessing, Bag of Words/TF-IDF) to convert movie metadata into meaningful numerical representations.
- Applied **cosine similarity** to identify the top 5 most relevant movie recommendations with high accuracy.
- Deployed the system with a **Streamlit/Flask/Django interface**, integrated **TMDB APIs** for live posters, and optimized inference using **Pickle-based model serialization**.

MarketInsight Chatbot [🔗](#)

- Built **Market Insight**, an AI-powered stock analysis platform that lets users explore real-time market data, company fundamentals, and news through simple, conversational queries.
- Designed a **LangGraph ReAct agent** using **LangChain** and **LLaMA 3 (Groq)**, connected to **Yahoo Finance** to automatically pull prices, financials, holdings, dividends, and analyst insights.
- Added **session-based memory** and smart tool selection so users can ask follow-up questions and receive clear, contextual answers.
- Created a **clean web-based chat interface** with Flask, HTML/CSS/JS, along with structured logging to support reliable and scalable backend operations.
